

I oppose any actions by the FCC or any other governmental entity to limit, regulate or restrict XM satellite radio broadcasts in any way, shape or manner. I particularly object to any effort to limit or restrict or even regulate weather or traffic broadcasts on XM satellite radio. I find the weather and traffic reports to be especially helpful. Attempts to limit, restrict or regulate XM radio broadcasts of any kind will not serve the best interests of the public at large.

Thank you for taking time to consider my comments.

Donald L. Christian, Jr.
